PROJECTS

- ✓ **HAND GESTURE BASED SYSTEM CONTROL USING MEDIAPIPE**
This research investigates the implementation of a hand gesture-based system control utilizing the Mediapipe framework. By harnessing the power of computer vision, the system interprets real-time hand gestures, enabling users to seamlessly control various functions.
- ✓ **AN AI POWERED APPROACH FOR REVOLUTIONIZING INTERVIEW WITH SMART INTERVIEW ASSISTANT**
The project leverages the capabilities of Artificial Intelligence (AI) to revolutionize the traditional interview process within human resources
